PROFILE

Full-stack developer with 2+ years of experience shipping production web applications across Node.js, NestJS, Next.js, Angular, Django, and MongoDB. Comfortable across the stack — from query optimization and API hardening to building polished frontends. Drawn to problems where performance, security, and product feel all matter.

EXPERIENCE

Software Developer · Indeeya

Sep 2024 — Present

- Built atomic label generation with thread-safe counters, QR-code embedding, and ReportLab PDF rendering for 4×3" inventory labels.
- Designed multi-step ERP approval workflows with role-based access and real-time badge counts on Django + MongoDB backends.
- Delivered resource and reporting dashboards backed by aggregation pipelines, eliminating N+1 queries and surfacing utilization in Angular visualizations.
- Identified and patched critical API security vulnerabilities; reduced MongoDB query execution time by ~60% through targeted indexing.
- Day-to-day across Angular, NestJS, Node.js, Django, MongoDB, and Bitbucket pipelines in an Agile team.

Software Developer (Intern) · Techolas Technologies

Jan 2023 — Sep 2023

- Built full-stack web apps with Python, Django, and Flask backends paired with React frontends.
- Developed responsive UIs in React, HTML, CSS, JavaScript, and Bootstrap.
- Designed RESTful APIs to bridge the frontend and backend cleanly.

SELECTED PROJECTS

Void Vault

github.com/Sylvo6642/Void-Vault

Personal

Personal cloud storage with Discord as a file backend.

- Two-layer AES-256-GCM encryption (client-side via PBKDF2, then server-side) before splitting files into 25 MB chunks across up to 5 Discord bots in parallel.
- JWT auth with silent refresh, httpOnly refresh cookies, Google OAuth, and shareable links with expiry and password protection.
- Next.js frontend with upload, browse, download, rename, and delete; metadata in MongoDB.

Stack: Next.js · Node.js · Express · MongoDB · Discord.js · AES-256-GCM · JWT

SkillDash

Personal

Marketplace connecting customers with skilled manual-labor workers across India.

- Live worker tracking via Supabase Realtime; payment-on-assign trigger and three Supabase Edge Functions (assignment, payout, notification fan-out).
- Postgres schema with Row-Level Security and an auth trigger that auto-provisions profile rows on signup.
- Email/password and phone-OTP auth, dual-role switching between customer and worker dashboards.

Stack: React · Vite · Tailwind · Framer Motion · Supabase · Postgres · Edge Functions · Zustand · React Router · Leaflet
